CCTV Security Surveillance System With Point Of Sale Integration

## “SOLUTION OF CCTV SECURITY SURVEILLANCE SYSTEM WITH POINT OF SALE INTEGRATION”

The past few decades have witnessed market standardization on analog Closed Circuit Television (CCTV) systems. With the advent of the Digital Video Recorder (DVR), CCTV technology has been given a life extension.

With the evolution of the technologies CCTV security and surveillance solution has reach its fully advanced and digital stage and in addition provides the advantages of scalable and upgradeable.

ISODVR is the best surveillance solution for your business like retail outlet, food & beverages outlet, show room and so on to ensure all of them are monitored and engaged systematically and securely.

Apart from this, ISODVR provides the flexibility to perform integration to point-of-sale system. The text information for POS events as instance are monitored through your CCTV monitoring screen as well in real time basis.

This is absolutely a perfect solution of digital security and surveillance solution for your daily operations or businesses.
